

ElektroMont

Quality and Environmental Policy

The main profile of Elektromont Kft. is the assembly of printed circuit boards (PCBs) and their integration into electronic devices, as well as the provision of related electronic manufacturing services to its customers.

Our objective is to ensure that our services meet the expectations of our customers, partners, and other interested parties, and that they support long-term, sustainable, lawful, and competitive operation.

The management of the company is committed to fulfilling the requirements of the quality and environmental management system, maintaining its effectiveness, and continuously improving it in accordance with the requirements of MSZ EN ISO 9001:2015 and MSZ EN ISO 14001:2015 standards.

To achieve this, Elektromont Kft.:

- Has implemented and operates an integrated quality- and environmental management system, taking into account the organization's operating environment, strategic objectives, and the expectations of interested parties.
- Conducts its activities in full compliance with customer requirements as well as all applicable legal, regulatory, and other obligations.
- Applies risk-based thinking in the planning and operation of its processes in order to prevent nonconformities and to identify and utilize opportunities for improvement.
- Is committed to the continuous improvement of service quality, the prevention of errors, and the enhancement of customer satisfaction.
- Ensures that all employees are responsible for the quality of their own work and actively contribute to process improvement and the achievement of quality- and environmental objectives.
- Gives preference to the use of safe, environmentally friendly, and energy-efficient technologies in electronic manufacturing processes.
- Strives to prevent environmental pollution, reduce waste generation, optimize material and energy consumption, and manage resources responsibly.
- Monitors and, where feasible, reduces the environmental impacts of its activities, including environmental risks and the effects related to climate change.
- Regularly evaluates the performance of the quality- and environmental management system, sets objectives, and ensures the availability of resources necessary for continual improvement.
